Early Infant Assessment Redefined Video or DVD

A CINE – Golden Eagle award winning medical presentation featuring an eight-step gross motor skills examination comparing two six month old children, one with typical development and one with atypical development. The exam was developed by early intervention pioneer, Dr. Elsbeth König of Switzerland. An indispensable resource for early detection (28 minutes).

Created to work in conjunction with the “Early Infant Assessment *Redefined*” video or DVD. These tools are used to provide a thorough understanding of the gross motor skills examination.

- **Early Infant Assessment Redefined CDRom**

The CDRom consists of 69 color slides in PowerPoint format to demonstrate all the typical and atypical aspects of each of the eight positions featured in the gross motor skills examination.

- **Early Infant Assessment Redefined Student Handout**

A two-page black and white master that shows the two children from the film side by side. This teaching tool highlights the power of observation. Suitable for copying. English & Spanish versions

Assure Baby's Physical Development Poster

An 18" x 25" poster of Pathways' growth and development chart featuring milestones for play, speech and physical development. Ages three to fifteen months are depicted. Great for the doctor's office! Available in English & Spanish.

Assure the Best for your Baby's Physical Development

ESPECIALLY FOR PARENTS

Is My Baby OK? Video or DVD

English, Spanish and Chinese versions available (DVD includes all three languages)

This is a great teaching tool for parents and early childhood educators; it empowers them to recognize potential warning signs that could be indicators of a motor delay. Great gift for new parents. (28 minutes)

Is My Baby OK? Student Handout - A two-page black and white master shows the two children from the film side by side. This teaching tool highlights the power of observation. Available in English and Spanish.

Assure Baby's Physical Development Brochure

Printed versions available in English and Spanish

Web-site downloads available in numerous languages at www.pathways.org

Endorsed by the American Academy of Pediatrics and the National Association of Pediatric Nurse Practitioners, this brochure includes a growth and development chart that allows parents and professionals to track a child's physical, play and speech development from three to fifteen months of age. Great for new parents, doctors' offices and hospital pediatric units.

Five Essential "TUMMY TIME" Moves DVD

(Includes English, Spanish and CC versions)

A brief film that shows parents how tummy time can become a natural, hassle-free part of their baby's daily routine. Parents are encouraged to build up to an hour total of tummy time per day--in several short intervals--by the time the baby is three months old. (5 minutes)
